HTML Frameset Tutorial

By Xah Lee. Date: 2005-12-26. Last updated: 2020-06-12.

This page shows you how to have frames (like split panes) in HTML. Each pane can load a separate HTML page.

[click me to see frames](#)

Note: frameset is deprecated in HTML5. However, it's still supported by browsers, and likely will be forever for backward compatibility, and it is part of the HTML 4.01 Frameset standard.

Here's a example of split panes.

Create a page with the following content.

```
<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.01 Frameset//EN" HTML
"http://www.w3.org/TR/html4/frameset.dtd">
<html>
<head>
<title>HTML: Split Windows; Frameset</title>
</head>

<frameset cols="20%,80%">
  <frame name="lefty" src="a.html">
```
